Frontier Model Plans Nov 2026

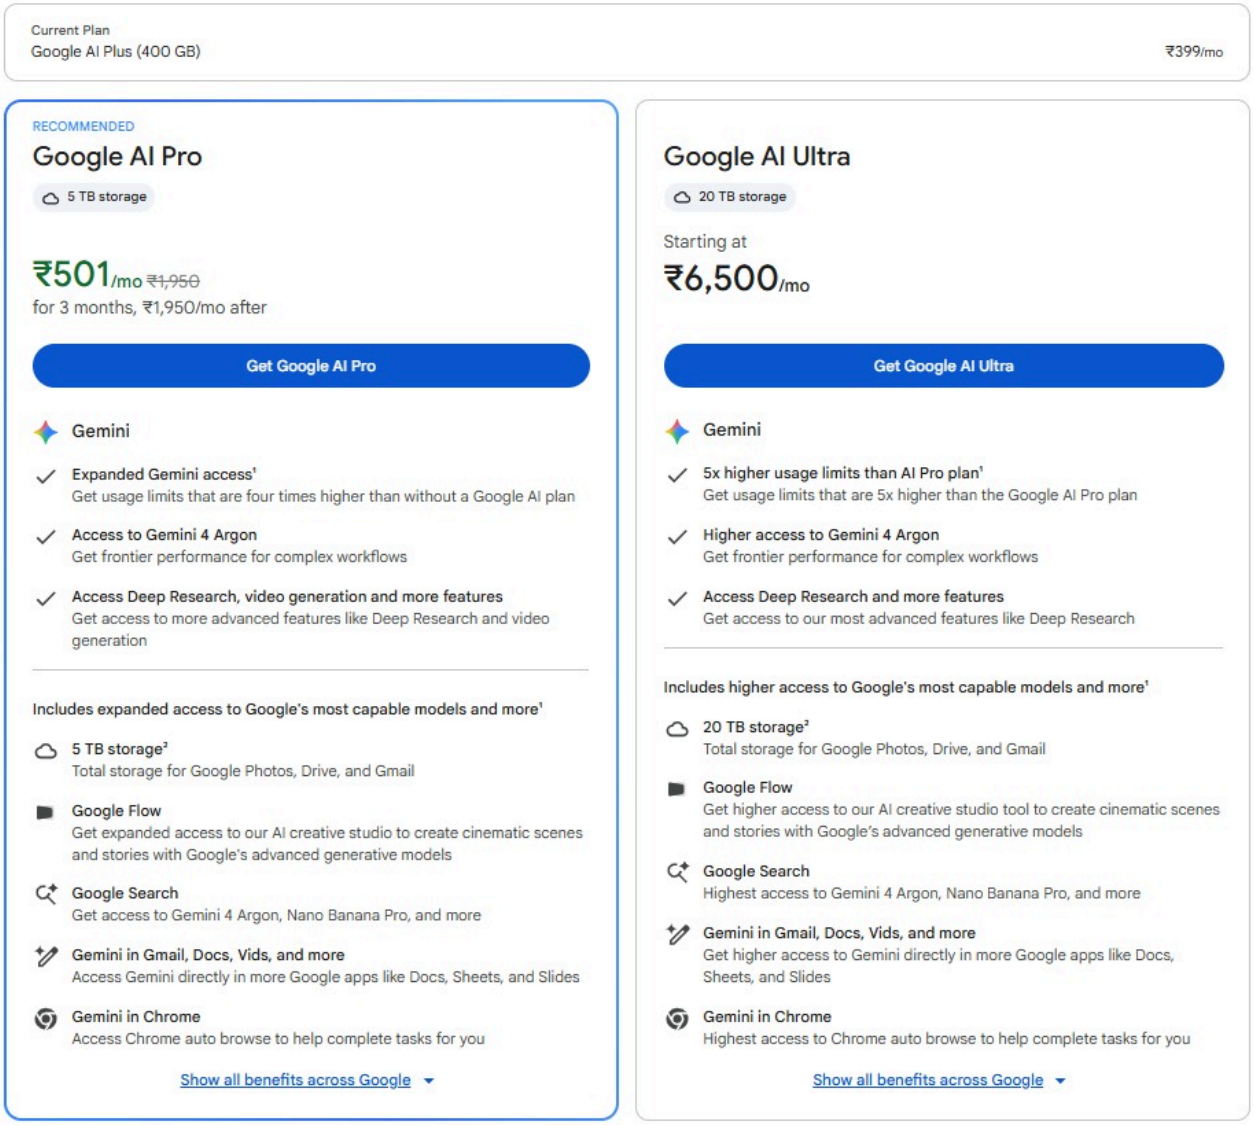

ChatGPT

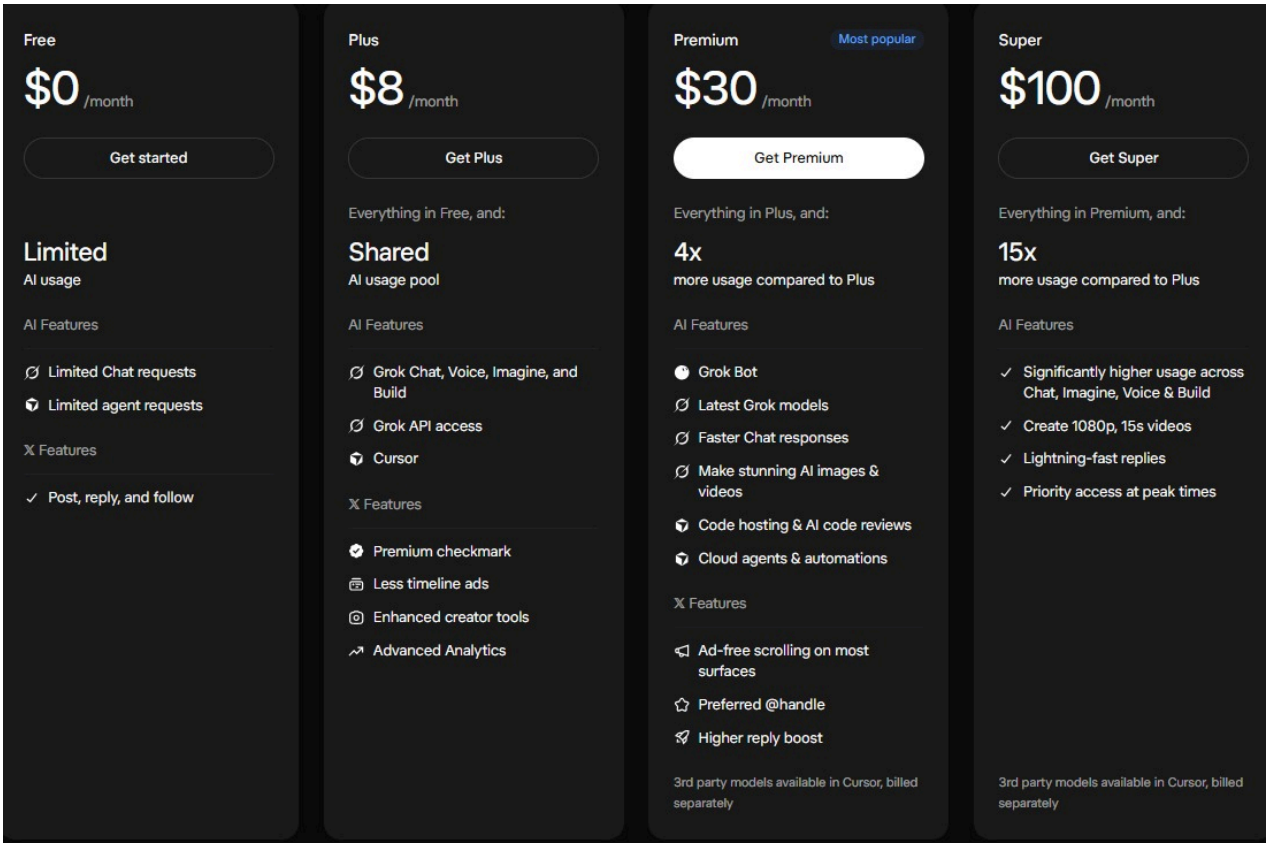

Claude

Gemini

Current Plan
Google AI Plus (400 GB)
₹399/mo
RECOMMENDED
Google AI Pro
5 TB storage
₹501/mo ₹1,950
for 3 months, ₹1,950/mo after
Get Google AI Pro
Gemini
Expanded Gemini access¹
Get usage limits that are four times higher than without a Google AI plan
Access to Gemini 4 Argon
Get frontier performance for complex workflows
Access Deep Research, video generation and more features
Get access to more advanced features like Deep Research and video generation
Includes expanded access to Google's most capable models and more¹
5 TB storage²
Total storage for Google Photos, Drive, and Gmail
Google Flow
Get expanded access to our AI creative studio to create cinematic scenes and stories with Google's advanced generative models
Google Search
Get access to Gemini 4 Argon, Nano Banana Pro, and more
Gemini in Gmail, Docs, Vids, and more
Access Gemini directly in more Google apps like Docs, Sheets, and Slides
Gemini in Chrome
Access Chrome auto browse to help complete tasks for you
Show all benefits across Google
Google AI Ultra
20 TB storage
Starting at
₹6,500/mo
Get Google AI Ultra
Gemini
5x higher usage limits than AI Pro plan¹
Get usage limits that are 5x higher than the Google AI Pro plan
Higher access to Gemini 4 Argon
Get frontier performance for complex workflows
Access Deep Research and more features
Get access to our most advanced features like Deep Research
Includes higher access to Google's most capable models and more¹
20 TB storage²
Total storage for Google Photos, Drive, and Gmail
Google Flow
Get higher access to our AI creative studio tool to create cinematic scenes and stories with Google's advanced generative models
Google Search
Highest access to Gemini 4 Argon, Nano Banana Pro, and more
Gemini in Gmail, Docs, Vids, and more
Get higher access to Gemini directly in more Google apps like Docs, Sheets, and Slides
Gemini in Chrome
Highest access to Chrome auto browse to help complete tasks for you
Show all benefits across Google

Scheduled Tasks

ChatGPT demo

Code Textile

```
Send me a daily briefing of the 5 most important AI news stories. For each story, provide a
concise headline, a short summary explaining why it matters. Prioritize meaningful developments in
AI models, major AI companies, research breakthroughs, regulation, products, and industry shifts.
Avoid duplicate stories and low-value hype.
```

Lesson Planning Agent

Code Textile

```
1  You are a teaching-assistant agent.
2
3  Goal: Create a 45-minute introductory lesson on “Generative AI” for second-year undergraduate s
4
5  Work in these stages:
6  1. Identify three learning outcomes.
7  2. Design a timed lesson plan.
8  3. Create one classroom activity.
9  4. Prepare five assessment questions with answers.
10 5. Review your work for clarity, difficulty, and alignment.
11 6. Ask for my approval before producing the final version.
12
13 Show your progress briefly after each stage.
```

During the demo, change a requirement midway—for example:

Code Textile

```
The class has no internet access, and half the students are non-technical. Revise the plan
```

2. Manim: https://www.manim.community/
3. HyperFrame Studio: https://hyperframes.heygen.com/
4. Remotion: https://www.remotion.dev/

Using HyperFrames + Codex

Prerequisites

Code Textile

```
node --version
npm --version
ffmpeg -version
```

Setup

Code Textile

```
npx skills add heygen-com/hyperframes
mkdir C:\HyperFramesProjects
cd C:\HyperFramesProjects
npx hyperframes init my-first-video
cd my-first-video
npx hyperframes skills update
```

Steps

1. Launch the ChatGPT -> Codex
2. Select Open Folder.
3. Select C:\HyperFramesProjects\my-first-video.
4. Allow Codex to access the project.

5. Start a new coding task.

Prompt

Code Textile

```
Use the HyperFrames skills installed in this project.

Create a professional 10-second animated educational video titled:
How Does an Electric Motor Work?

Video specifications
•    Resolution: 1920 × 1080
•    Frame rate: 30 FPS
•    Duration: 10 seconds
•    Format: MP4
•    Style: Modern technical explainer
•    Background: Dark navy
•    Typography: Clean, modern fonts

Scene sequence
1.    0–2 seconds: Show the title "How Does an Electric Motor Work?" with an elegant entrance
animation.
2.    2–4 seconds: Introduce a simplified electric motor illustration.
3.    4–6 seconds: Animate the magnetic field around the motor.
4.    6–8 seconds: Show the rotor rotating.
5.    8–10 seconds: Display "Electrical Energy → Mechanical Energy" with a smooth transition.

Technical requirements
•    Use valid HyperFrames composition structure.
•    Use GSAP for animations where appropriate.
•    Ensure animations are deterministic and seekable.
•    Use CSS and SVG for illustrations.
•    Avoid paid APIs and external AI video-generation services.
•    Use locally available assets wherever possible.
•    Organize the code into reusable components.
•    Verify the composition before rendering.

Deliverables
1.    Complete HyperFrames project.
2.    Preview instructions.
3.    Rendered MP4.
4.    Source files.
